

## Windchill Workgroup Manager for ZWCAD

With the Windchill Workgroup Manager for ZWCAD, companies can now manage their ZWCAD generated .DWG files natively from their ZWCAD interface. Using the Windchill Workgroup Manager, ZWCAD users can now benefit from the power of Windchill Data Management including

- Revision and instance control
- Change management
- Advanced Workflows
- Design States
- Advanced Search
- Enterprise Wide Viewing

The Windchill Workgroup Manager for ZWCAD includes many of the standard tools Windchill users have come to expect, including.

- Check files into and out of Windchill directly from the ZWCAD interface.
- Open files directly into ZWCAD from the Windchill interface
- Accomplish standard local workspace functionality such as clear, refresh, and update
- Checkout directly from the Windchill Workspace, including “undo”
- Publish viewables using the CAD Worker (PDF format)

ZWCAD enables organizations to significantly decrease the cost of managing .DWG design files. When coupled with the Windchill Workgroup Manager, customers can now also experience more value from that design data by leveraging automated revision control and traditional change management tools.
